AoR 200 Club Rules available from the Junior Representative (JR). Completed scoresheet must be given to the JR.

AoR 200 Club Rules

Purpose:
AoR's 200 club is designed to help archers learn how to record scores correctly and it also provides them with a safe way of progressing to the higher distances. Badges are awarded for a qualifying score for each distance achieved and once the badge has been awarded the next distance can be attempted.

Rules:
1) The AoR 200 club is open to all full and associate members.

2) A properly printed 200 club score sheet must be fully completed and signed by both the archer and the target captain. This must be handed to the Junior Representative ASAP. The archer can then progress to the next distance.

3) Archery GB rules of shooting and AoR shooting rules must be observed throughout.

4) Participants must clearly display their current badge whilst shooting (this includes practice sessions) to show which distances they have achieved and which distance they are shooting for next.

5) Archers should not shoot at a distance higher than the distance that they are currently working towards. This is to avoid repetitive lost arrows on the field by trying to shoot at distances beyond the archer's capability.

6) Six sighting arrows are permitted before the scoring ends begin. Shooting more than six sighting arrows will render the round null and void.

7) All archers participating in the AoR 200 club must be supervised by an adult or the Junior Representative during the scoring of each end. The score sheet must be completed by another adult archer (not the archer's parent), i.e. the archer must not record their own scores on the scoresheet.

8) Any mistakes during the calling or recording of scores, must be brought to the attention of a club official who will make the necessary correction - preferably in red ink. They should also initial the correction to authorise it.

9) Recurve and Compound archers must achieve a score of 200 or more for the round. Archer's shooting Longbow, Horsebow, Flatbow (Traditional Bows) and Barebow need to achieve a lower score as defined on the score sheet.

10) The scoring round shall consist of three dozen scoring arrows shot at each distance using a 122cm target face and ten zone scoring. Distances shall be as defined on the score sheet.

11) In the event of any scoring discrepancy, a club official shall be called over to call the arrow. This is the same procedure for any archery competition.

12) Awards shall be presented at a time and place as decided by the Junior Representative. This might be immediately following the scoring round, or sometime later if the Junior Representative is not on the field or unable to make the presentation. The Junior Representative may be assisted by an adult or other club member as requested.

13) In the case of any dispute regarding the AoR 200 Club, the Junior Representative or Club Chairperson or Vice Chairperson (in that order of seniority) shall have the deciding decision.

14) By entering the AoR 200 Club scheme, all archer's agree to have their name, achieved scores and distances published to the member's area on the club website.
